Food Numeracy Element 1:

Cost of food production, and food processing practices - implications to health, economy and environment

Food Numeracy Element 2:

Cost of food consumption practices-implications to health, environment and economy

Food Numeracy

"Food numeracy is a set of knowledge and skill, empowering individuals to partake of daily food of its value

Shakeri, S., McDaid, K. P., Fethney, J. (2021). Food numeracy: definition and application across the Australian secondary schools' curriculum. Journal of Education and Training studies.
